Flip-Up Flap Fun Fold Card

Supplies Needed:

Veramark ink
Balmy Blue cardstock (base)
Basic White cardstock
*Meandering Meadows designer series paper

So Sincere stamps
Autumn Leaves dies
Fine sparkle gems
Silver trim
Adhesives

General Measurements:

Card base

Basic White cardstock
Meandering Meadow DSP
White paper
Vellum

5 1/2" x 8 1/2" Balmy Blue cardstock
scored at 4 1/4"
4" x 5 1/4"
Full 6" x 6" sheet
4" x 5 1/4"
1 1/2" x 2 1/2"

Directions:

1. Cut 5 1/2" x 8 1/2" Balmy Blue cardstock. Score at 4 1/4".
2. With the long edge at the top and the score line running vertically, cut a 1" line on the score

mark from both the top edge and bottom edge.

3. Turn the cardstock so that the short edge is now at the top and the score line is running horizontally. Cut 1" from each side, matching up with the horizontal cut you just made along the score line. When finished, you should have a roughly 3" panel left as the card front.
4. Select a 6 x 6" sheet of DSP. For this example, we are using Meandering Meadow. Begin by cutting the panel down to 4 1/8" x 6".
5. With the long edge at the top, cut 1 3/8" from each side of the DSP so that the resulting panel measures 3 1/4" x 4 1/8". Keep the 1 3/8" strips.
6. Cut a piece of white paper 4 1/8" x 5 3/8" and adhere to the inside of the card base.
7. Next adhere each of the 1 3/8" strips of DSP on either side of the white paper. Most of the strip of DSP will show through when the card is closed.
8. Now adhere the larger panel of DSP to the card front.
9. Diecut the vellum sentiment panel using the Autumn Leaves die.
10. Stamp the So Sincere sentiment with Versamark on the vellum. Cover with embossing powder and heat emboss until cured.
11. Cut a piece of silver trim and wrap and tie around the card front. Adhere the sentiment panel on top.
12. Embellish as desired. For this example, fine sparkle gems were adhered around the sentiment panel.

* NOTE: Meandering Meadow DSP releases in early November 2023 as an Online Exclusive product. Any designer paper could be substituted.
